The Magic Eye Lighting Processor from Dolphin Marine

The Magic Eye Lighting Processor has a unique design enabling flexibility in the design of your lighting control.

Setting both the interior and exterior lights for your home can be achieved by simply pressing one button on your remote control.

Its easy to compliment activities with the appropriate lighting.

Different lighting levels and scenes can be pre-set for activities such as: television viewing, entertaining reading, etc.

All lights can be precisely controlled either individually or collectively at the touch of a button

- fade out all the lights on your vessel with just one touch.

LED Version Also Available!
